Techrider: BRDN - Duo

We travel with a Behringer XR18 Interface. All tracks are already mixed and we basically only have to go from our unbalanced main out to your console. Further tweeks are possible via the connected Ipad, which functions as a controller for the XR18. In-Ear-Monitoring also runs directly through the XR18.

Lighting: Preferably dark stage, lighting from behind with occasional spotlights.

Should the connection via unbalanced out not be possible for whatever reason, this is the patch plan for our Setup:

Ch.	Instrument	Notes
1	Click	Separate DAW-Track
2	Click	Separate DAW-Track
3	Korg Volca Keys	Mono-Out
4	Guitar	Direct in
5	Aux	Midi-Controller / Backing-Tracks
15	Vox 1	SM 58
16	Vox 12	SM 58
Aux 1	IEM Return	
Aux 2	IEM Return
